Today I became a grand mother.

ADOPT A MOTHER.

HELP A WOMAN OF THE THIRD WORLD TO GIVE BIRTH WITHOUT RISK.
AND HER CHILD TO NOT GROW UP WITHOUT HER.

In Italy when a woman is pregnant she can rely on a network of healthcare structures, pre-delivery courses and emergency obstetric services. In the developing countries it is not like this: only half of them are assisted by specialized personnel, many women do not have any prenatal checkups not even an ultrasound examination. Often the nearest hospital is miles away and not equipped for an emergency. For 20 euros a month for a period of one year you can ensure that a woman in the third world receives appropriate medical care before, during and after delivery. And save her life.
